

Solve and give the best answer

$$3 + 77 = 80$$

$$5 - 77 = -72$$

$$88 - 6 = 82$$

$$(5)(4) = 20$$

$$\frac{1}{2} + \frac{1}{2} = 1$$

$$3.1 + 2.4 = 5.5$$

$$\frac{3}{8} + \frac{5}{8} = \frac{8}{8} = 1$$

$$33 + 99 = 132$$

$$33 - 99 = -66$$

$$440 - 41 = 399$$

$$444 + 66 = 510$$

$$12 \div 6 = 2$$

$$120 \div 6 = 20$$

$$\frac{3}{4} + \frac{1}{2} = \frac{3}{4} + \frac{2}{4} = \frac{5}{4}$$

$$66.7 - 16.8 = 49.9$$

$$302 - 103 = 199$$

$$17 - 12.3 = 4.7$$

$$17 + 12.3 = 29.3$$

$$17.3 + 12 = 29.3$$

$$17.3 - 12 = 5.3$$

$$700 / 10 = 70$$

$$300 / 3 = 100$$

$$1.25 - 1.21 = 0.04$$

$$16 - 88.4 = -72.4$$

$$3 - \frac{1}{2} = 2\frac{1}{2}$$

$$3 - 0.5 = 2.5$$
